Under-Construction: Enma Mall (Bahrain)

Kirby has completed supply of the steel structure for Enma Mall in Bahrain. The mall is being designed by renowned architect, Aref Sadiq Consultants. The mall will feature shops, showrooms, cafes and a hypermarket. Some of the technical highlights are:

- 'Boat shaped' architectural features
- Curved fascia structure decorated with aluminum panels
- Around 52,000 square meters area
- Total Steel Weight: 4,000 MT

Kirby held another Technical Seminar in Saudi Arabia

Kirby's Technical Seminar in Jeddah, on 4th May, was third in the series of seminars in the country, after Riyadh and Dammam. Wael Elqadah, GM Middle East, highlighted Kirby's worldwide operations and especially the importance of KSA market for Kirby, where it has completed many landmark projects over the years. Alaeddin Jarrar, Director Engineering, conducted technical sessions on Kirby's PEB and Structural Steel products. He also elaborated on Kirby's capabilities in Steel industry through its open web joists and curved structures, and how they allow architecturally complex buildings to be fabricated from Steel. These events brought together several contractors, consultants and business owners from the KSA construction industry.
