Kirby Building Systems

Recently Completed: Multi-Storey Car Park (Abu Dhabi)

A multi-storey car park for Al Fahim's Mercedes Benz showroom in Abu Dhabi was recently completed, and the steel building was supplied by Kirby Building Systems. Some of the technical highlights are:

- 6 storey with 2.95m clearance for each floor
- Total Steel Weight: 1,150 MT
- Length 64m , Width 36m, Height: 29m

Kirby hosted Technical Seminars at Kuwait, Dammam, Riyadh & Abu Dhabi

Kirby Building Systems held various technical seminars on "Steel Solutions" in the last couple of months. These events brought together several contractors and consultants from the construction industry in Kuwait, KSA, and UAE. Wael Elqadah, GM Middle East, highlighted Kirby's operations in the region. Alaeddin Jarrar, Director Engineering, conducted technical sessions on Kirby products i.e. PEB and Structural Steel. He also elaborated on Kirby's capability in Steel industry through its open web joists and curved structures, and how they allow architecturally complex buildings to be fabricated from Steel. The large gathering of industry professionals appreciated this initiative from Kirby and requested more similar interaction in the future.
