Kirby India Supplies Steel Bridge Girders for Commonwealth Games 2010 in Delhi

Kirby India is successfully carrying out supply of a new application - **Steel Bridge Girder** for 2010 Commonwealth Games at New Delhi. The structural steel bridge girder running over 6 KM length is "First of its Kind" in India and Kirby is in the forefront of this new application. The order is valued at approx 1.2 KDM involving 2,500 MT of steel and is awarded by Gammon India, one of the largest civil engineering construction companies in India. **Technical Advantage:** There are many advantages of bridge girders manufactured with steel 'I' beams. The prefabrication of components means that construction time on site is minimized. Prefabrication in controlled shop conditions leads to high quality work at minimum cost. The quality control extends from the material itself and follows on through the processes of cutting, drilling, welding, fit-up and painting. Also, Steel bridges are adaptable and can readily be altered for a change in use. They can be widened to accommodate extra lanes of traffic, and strengthened to carry heavier traffic loads.

Kirby Pakistan participates in the 6th Build Asia 2010 Exhibition

Kirby Pakistan participated in the 6th Build Asia 2010 exhibition which was held from 27- 29 July 2010, at the Karachi Expo Center, Pakistan. The exhibition was well-organized and attended by industry leaders from the building and construction sectors. The Kirby stall not only attracted the audiences from the construction and building sector but also catered to the various inquiries generated from other sectors like steel, piping, housing, etc. The exhibition was a good platform for sharing the Kirby range of Products and Services to Contractors, Consultants, Architects, Engineers and End Users. Kirby Karachi and Lahore sales offices represented Kirby at the exhibition.
